Double Down: When the dealer upcard is 4, 5 or 6.

Hit: When the dealer has anything else showing.

Why to double down on soft 15 and soft 16

If he or she is holding a 4, 5 or 6 upcard, there is likelihood that a ten will

be hit and then another ten because of the higher density of ten cards being played in blackjack.

You are safer having a soft 15 or 16 anyways so it doesn't hurt to double down and hope for a better hand.

Now it becomes tougher if the dealer doesn't have those ideal cards showing and it's not as likely that he'll bust.

It doesn't hurt to hit since the soft hand will prevent you from ever busting and you really have nothing to lose here.

This is mathematically the correct blackjack move to make as well over the long term.
